Guest Lecture, Forestry Dept. USU (Medan)

During my short visit in Medan (Sumatera Utara), I had a chance to visit Department of Forestry, USU and gave a guest lecture on "Genetic variation of priority tree species in Indonesia". The lecture was moderated by Dr. Basyuni and attended by students as well as teaching staff. The lecture discussed the following topics: research road map, research findings, update on status of genetic variation and outlooks including science - policy interfacing.
