Welcome

Dear visitor,

Thank you for visiting my personal website.

As you may know well that a lecturer at a university in Indonesia is obliged to undertake *Tridarma Perguruan Tinggi*, which means *three kind of works* such as teaching, research and extension, and plus supporting activities. This website informs you about my activities and achievements as an academician working at Bogor Agricultural University (IPB).

I was graduated from this university in 2003 for Undergraduate and 2008 for Master degree. My common interest is environmental information and control. Now, I am pursuing PhD degree in the University of Tokyo.

I hope you will know me better after you visit my website, and it is my honor if you are then willing to have intense communications with me. Thank you again for visiting my website.

Best regards,

Chusnul Arif
