Research Project

- Development of replicas and healing of infarct heart walls in pigs as a therapeutic model for humans; 2020-2020; RISPRO, Kemendikbud
- Diagnostic Imaging Application in Supporting the Development of the Kintamani Dog as Indonesia's First Pure Breed Dog; 2017-2021; PMDSU, Kemenristek Dikti
- Custom Made Bioceramic Implant as Bone Filling Material in Comminuted Fracture Case in Veterinary Practice; 2016-2019; PMDSU, Kemenristek Dikti
- In Vitro and In Vivo Study of Biodegradable Metal Bioceramic for Orthopedic Implants Application; 2016-2019; PMDSU, Kemenristek Dikti
- Design and Development of Biodegradable Metals for Temporary Ureteral Stent Applications; 2017-2019; Hibah KLN & Publikasi Kemenristek Dikti
- Development of Native Metal-Based Bio-Active Degradable Medical Implants For Self-Supporting National Industry; 2015-2017; AIC for Research Collaboration & Kemenristek Dikti
- Innovations of the Newly Designed Glaucoma Implant Made of Polymethylmethacrylate: the Tissue Response on the Rabbits and the Effectiveness of the End Stage Glaucoma Patients; 2015-2016; Kemenristek Dikti
