Visit School of Earth and Environment, University of Leeds 13 - 22 August 2018

As a part of Transboundary Fire haze: Regional characterization, prediction and Mitigation in SE Asia (TransFoRM) project, we are conducting research on land use land cover change in relation with forest and land fires. In order to evaluate progress of the project, I and Dr Lailan Syafina from Faculty of Forestry visited the School of Earth and Environment (SEE), University of Leeds on the period of 13 – 22 August 2018. We had effective discussion and sharing sessions with our research partners Prof Dominick Spracklen, Ass Prof. Steve Arnold and other colleague in SEE during the visit.
